Work Experience

Senior Software Engineer Nov. 2020 – Present
Deloitte, USI *Bengaluru, Karnataka*

- Led the design and deployment of scalable microservices using Flask and Node.js on AWS (EC2, S3, Lambda), handling **50K+ daily API requests** with **99.9% uptime**
- Modernized legacy systems by containerizing applications with Docker, reducing deployment time by **60%**
- Designed distributed backend services with custom load-balancing strategies to improve system reliability and scalability
- Deployed ML-powered APIs on NVIDIA GPU clusters, reducing inference latency by **40%**
- Improved API throughput by **50%** through caching, database indexing, and query optimization
- Conducted Git and Docker workshops for **150+ engineers**; received **two Deloitte Spot Awards** and a mid-year promotion

Software Engineer June 2019 – Nov. 2020
Zeliot *Bengaluru, Karnataka*

- Built and optimized **GraphQL-based microservices** using Node.js and PostgreSQL, reducing API response time from **10s to 0.5s**
- Increased front-end responsiveness by **70%** by migrating pagination and search logic to backend services
- Developed tracking and analytics service to capture API usage metrics and support data-driven business decisions
- Implemented centralized logging and structured error handling to improve observability and debugging
- Collaborated with product and engineering teams to design high-throughput, scalable data pipelines

Back-End Developer June 2018 – July 2018
Grow Fit *Bengaluru, Karnataka*

- Developed production-grade REST APIs using Ruby on Rails for revenue reporting, supporting **50+ internal users**
- Resolved production issues and optimized SQL queries, improving API performance and system stability

Projects

Let's Quiz Web App | *Python, Django, JavaScript, PostgreSQL, Bootstrap* Feb. 2018 – Apr. 2018

- Built a full-stack quiz platform with authentication, leaderboards, and randomized question generation
- Deployed on PythonAnywhere; achieved **5,000+ user sign-ups**, **270+ GitHub stars**, and **130+ forks**
- Implemented session-based tracking to ensure unique question sets per user

Additional Experience

Open Source Contribution – NIT Durgapur Portal Oct. 2019 – Dec. 2019

- Contributed to an academic portal (Python/Django) used by **500+ users**, adding authentication and content management features (GitHub)

Volunteer Developer Aug. 2018 – Nov. 2018

- Designed and deployed a Django-based platform to digitize **10,000+ land records** for Jhansi district, actively used by **50+ Tehsil officials**

Education

BIET Jhansi, Uttar Pradesh
Bachelor of Technology in Computer Science *July 2015 – May 2019*

Technical Skills

Languages: JavaScript, Python, C
Frameworks: Flask, Node.js, Django, FastAPI, GraphQL
Databases: PostgreSQL, MySQL, MongoDB
Cloud & DevOps: AWS (EC2, S3, Lambda, OpenSearch), Docker, Linux, CI/CD
Tools: Git, Postman, REST APIs
Concepts: Microservices, Distributed Systems, API Design, System Design, Scalability
