Work Experience

Senior Software Engineer Dec. 2023 – Present
Deloitte, USI (Consulting) *Bengaluru, Karnataka*

- Designed and owned production-grade backend services in Python (Flask), handling over 50K daily requests with 99.9% availability, deployed on AWS using EC2, Lambda, and S3
- Modernized legacy systems by containerizing applications with Docker, reducing deployment time by 60%
- Improved API throughput by approximately 50% using Redis-based caching, database indexing, and query optimization
- Implemented request idempotency, retries, and timeout handling to improve fault tolerance in distributed systems
- Deployed machine learning inference APIs on GPU-backed instances, reducing batch inference latency by approximately 40%
- Led backend architecture initiatives and delivered internal Docker, AWS, and Git workshops to 150+ engineers; received two Spot Awards and a mid-year promotion

Software Engineer Nov. 2020 – Dec 2023
Deloitte, USI (S&A) *Bengaluru, Karnataka*

- Built and maintained RESTful backend services using Flask and Node.js for enterprise analytics platforms
- Integrated AWS services such as EC2, S3, and Lambda to support scalable, API-driven systems
- Optimized PostgreSQL and MySQL schemas, indexing strategies, and queries to reduce API response times
- Collaborated with data science teams to productionize machine learning models as APIs within Agile teams

Software Engineer June 2019 – Nov. 2020
Zeliot *Bengaluru, Karnataka*

- Developed GraphQL-based microservices using Node.js and PostgreSQL, reducing API latency from 10 seconds to 0.5 seconds
- Improved application performance by 70% by moving pagination, search, and filtering logic to backend services
- Built centralized logging and structured error handling to improve API observability and debugging efficiency

Backend Developer, Intern Oct. 2018 – Dec. 2018
Zeliot *Bengaluru, Karnataka*

- Contributed to production Node.js services by implementing APIs, optimizing SQL queries, and improving logging and validation; gained hands-on experience with production debugging and service reliability

Backend Developer, Intern June 2018 – July 2018
Grow Fit *Bengaluru, Karnataka*

- Developed REST APIs in Ruby on Rails for revenue reporting, supporting 50+ internal users
- Fixed production issues and optimized SQL queries, improving performance and stability

Projects

Let's Quiz Web App | *Python, Django, JavaScript, PostgreSQL, Bootstrap* Feb. 2018 – Apr. 2018

- Built and scaled a full-stack quiz platform with Django and PostgreSQL, supporting 5K+ users, implementing authentication, leaderboards, randomized quizzes, and optimized DB queries; achieved 270+ GitHub stars

Education

BIET Jhansi, Uttar Pradesh
Bachelor of Technology in Computer Science *July 2015 – May 2019*

Technical Skills

Languages: JavaScript, Python
Frameworks: Flask, Node.js, Django, FastAPI, GraphQL
Databases: PostgreSQL, MySQL, MongoDB
Cloud & DevOps: AWS (EC2, S3, Lambda, OpenSearch), Docker, Linux, CI/CD
Tools: Git, Postman
Systems: Distributed Systems, Microservices, API Design, Scalability
